EXPERIENCE

“Kolesa Group”

Almaty, Kazakhstan

iOS Developer ([Kolesa.kz](https://kolesa.kz), [Krisha.kz](https://krisha.kz), [Market.kz](https://market.kz), [Avtoelon.uz](https://avtoelon.uz))
present

September 2017 –

- Designed and implemented saving search queries with further notifications about new positions, which resulted in higher retention and Daily Active Users
- Designed and implemented chat features such as sending images, audio messages, location and own adverts, which resulted in more contacts and retention
- Developed balance top up and NPS modules, that are used across several projects
- Refactored legacy domain models code, leading to 15% less memory consumption and 20% less network traffic usage
- Developed an impact analysis script to identify if a project build needs to be ran on CI/CD when making changes in common modules, which led to shorter build queues and less build waiting time

EDUCATION

International Information Technology University, Almaty, Kazakhstan
2018

Sep 2014 – Jun

- Bachelor of Engineering and Technology in Information Systems (GPA 3.73/4.0)
