EDUCATION

Kazakh British Technical University
B.S. Computer Systems and Software

Graduating May 2025
3.64/4.00 GPA

Relevant coursework: Algorithms and Data Structure, OOP, Discrete Math, Calculus, Linear Algebra

TECHNICAL SKILLS

Languages: JavaScript, Golang, Python, C++, Java

Frameworks and Databases: React.js, Node.js (Express), Django, PostgreSQL, Angular, Gin

Technologies: Git, Linux, Redux, Docker, Rest API, Postman Swagger, Kafka, Clean Architecture

EXPERIENCE

Ligeia.AI, Almaty, KZ

FrontEnd Developer

Jan 2023 – Jun 2023

- **Stack:React.js, Redux, Python(Django)**
- Collaborated with a team of **5** to design a factory-specific website using **Django** (backend), **PostgreSQL** (database), and **React.js** (frontend).
- Crafted a real-time area chart widget using **React.js** and **d3**, enhancing data visualization capabilities.
- Automated UOM data extraction from POSC sources with **Python**, achieving a **20% faster scraping speed**; used **beautifulsoup4** and **pandas** for data transformation into CSV.
- Engaged in **daily team discussions** emphasizing **code reviews** and **task planning**, ensuring high **code quality** and alignment with **project goals**.

APPRENTICESHIP

Nfactorial Incubator 2022, Almaty, KZ Full Stack Web Development Bootcamp Participant Jun 2022 – Aug 2022

- Among **4,000** applicants, earned a spot among **150** selected participants in the **10-week international Bootcamp**
- Focusing on HackerRank **algorithmic** contests, **soft** skills, and **educational** potential, while gaining expertise in the **MERN** stack for independent **full-stack** web application development,
- Extensive knowledge of **Linux**, **Git**, and **client-server architecture** through practical assignments, and creating a **React.js-based** web app for anime quote discovery.

PROJECTS

Anisearch

Jun 2022 – Aug 2022

Building **React** app that helps users to find an anime quote based on keywords.

[Link to project](#)

- **Stack:React.js, Node.js**
- Developed a **React** application for discovering anime quotes based on keywords, integrated the AnimeChan API for random quotes, and Achieved a **20% improvement** in performance by leveraging expertise in **React hooks** and addressing and resolving codebase issues.

Golang e-commerce app

Apr 2023 - May 2023

Led team of four to design and develop an e-commerce app

[Link to project](#)

- **Stack:Golang, PostgreSQL, Docker**
- Implemented **normalized tables** for various user roles and items in **PostgreSQL**, bolstered **security** with **JWT** authentication for user registration and login, streamlined server and database orchestration using **Docker Compose**, and created a **Golang-based RESTful API** to facilitate seamless CRUD operations for data management.
