"Software is art."

Summary

Current Middle Backend Developer at product company Online Gymnasium. I have experience in developing microservice architecture, working with databases, parallel tasks, converting files, integrating external services, working with caching, as well as training new employees. Special- izing in RESTful API realization. Using Django REST Framework and FastAPI for this purpose. Prefer to use FastAPI and developing structure of system manually. Also prefer to use Linux, namely Manjaro. Interested in challenging tasks related to architecture development and learning new technologies.

Work Experience

Online Gymnasium

MiDDLE BᴀCKEND DEVELoPEr

Remote
Feb. 2020 - Present.

- Developed database structure via Django ORM.
- Worked with Celery tasks. Applied best practises.
- Implemented integration between BigBlueButton and Django REST Framework.
- Used Test Driven Development.
- Built structure of the project via style guide.
- Implemented RESTful API microservice.
- Worked with Docker and Docker Compose.
- Realised ORM optimization.
- Developed an application for converting files from two services (JOD Converter and CloudConvert)

Freelance

JuNior BᴀCKEND DEVELoPEr

Baku, Azerbaijan
Feb. 2019 - Feb. 2020

- Developed payment system.
- Worked with OpenCV on Python.
- Realized authentication system for FastAPI.
