Pavel Prysiazhniuk
FRONT END DEVELOPER

Lynnwood, WA —taaay.pr401@gmail.com — (425) 000-6524 — Linkedin

SUMMARY

Skilled Front End engineer with 6 years of experience in architecting, building, and delivering scalable solutions in the fintech, e-commerce, and entertainment industries. I have expertise in coaching, mentoring, and interviewing engineers. I'm looking for a project that will solve real problems and where I can see the value I bring to clients.

EDUCATION

College of Service and Design   Bila Tserkva, Kyiv Oblast
Bachelor's degrees in Information Technology   Sept. 2012 – June 2015

Markup course
HTML & CSS, MUI, Ant Design   July 2016

IT-INCUBATOR course
React, Redux, TypeScript, JavaScript   August 2016

EXPERIENCE

Attract group   Las Vegas, NV
Front end developer   May 2019 - Present

· Boosted web-app rendering time 2x using Server-Side Rendering.
· Sped up rendering of detected objects in the play mode by 30x (up to 30fps with 5000 detected objects in each frame)
· Improved the velocity of displaying data of tracked object in real-time by 50%
· Increased the accuracy of audio and video processing from 100ms up to 17ms
· Created an API SDK with data normalization for 3 platforms (Web, Mobile, Desktop) which reduced time to develop a web application 4x.
· A go-to person in the company in the area of Server-Side Rendering.
· Built a solution for QA to quickly test on different users, which reduced time to log in from 1-2 min to 10 sec.
· Created reusable components for React and React Native apps, which reduced time to develop a mobile app by 20-30%.

It-incubator   Vilnius, LT
Mentor of students   April 2018 - May 2019

· The process of identifying common mistakes among students has been optimized, which has increased the speed and level of passing test tasks by 15%.
· Developed mentoring and training programs
· Implemented new approaches and technologies on the company level
· Conflict resolution, problem-solving
· Technical Support & Code Review

Esverito   Krakow, PL
Front end developer   May 2017 - April 2018
Project: CRM for a tourism company. Web and mobile apps for online tickets booking.

· Performance optimization for displaying and loading comments and replies for a video stream.
· Accelerated work and processing requests from users 5 times for operators, automating work processes within the company through the development of CRM.
